PROFESSIONAL SUMMARY

Results-driven Cloud & DevOps Engineer specializing in AWS infrastructure automation, container orchestration with Docker and Kubernetes, and zero-downtime CI/CD pipelines.

TECHNICAL SKILLS

Linux • Docker • AWS • CI/CD • Bash/Shell • Git/GitHub • Kubernetes • PostgreSQL • Prometheus • Python • Problem Solving

WORK EXPERIENCE

DevOps Engineer - Apex Cloud Systems

[Apex Cloud Systems | 2022 - Present](#)

- Architected automated CI/CD pipelines via GitHub Actions, decreasing release cycle from weekly to daily.
- Managed AWS multi-region infrastructure (EC2, S3, RDS, ECS) with Docker containerization.
- Set up centralized monitoring and alerting with Prometheus and Grafana.

EDUCATION

B.S. in Information Systems - Metro University (2018 - 2022)
